- English (Intermediate)
- Urdu (Fluent)

PROFESSIONAL SUMMARY

Full-stack developer specializing in Agentic AI and modern web technologies. Experienced in building high-performance E-commerce platforms and AI-driven applications. Currently interning at Aykays Agency and pursuing advanced AI studies at GIAIC.

I am currently an advanced student at the Governor Sindh Initiative (GIAIC), where I am now specializing in Agentic AI. My hands-on experience is further solidified by participating in multiple Hackathons . where I built complex projects like AI Humanoid systems and real-time collaborative tools. I am actively developing Agentic AI solutions using the OpenAI SDK and MCP Servers.

- Digital FTE (Hackathon 5): Multi-channel system (WhatsApp, Gmail) using OpenAI SDK & Kafka
- My AI Employee (Hackathon 0): Workflow automation via Gmail, LinkedIn, & Odoo.
- Physical AI & RAG Chatbot: Interactive AI system using Retrieval Augmented Generation for contextual learning and environmental interaction.
- AI-Powered CLI Todo App (Hackathon 2): Advanced task manager with AI Assistant integration and Natural Language Chatbot for text-based task entries and local data persistence.

WORK EXPERIENCE

JAN 2026 - MAR 2026

Frontend Developer Intern | Aykays Agency

- Built a high-performance E-Commerce Storefront using React, Firebase, and Stripe.
- Managed real-time data, secure authentication, and fully responsive UI/UX design.
- Focused on deploying scalable web solutions using modern tech stacks.

ONGOING EDUCATION

JAN 2024 - TILL PRESENT

Artificial Intelligence, Web 3.0, and Metaverse (Agentic AI)

- At the Governor House in Karachi, we are acquiring the latest skills and technologies related to AI.
